

Millimar S 1840 compact column amplifier

Features

- Easy to read 3 color analog display
- For measurement with inductive probes (e. g. Mahr P2004) or electronic plug gages etc
- Two inputs for Inductive Probes (alternatively compatible with probes from Mahr, Mahr-Federal, Tesa, Marposs)
- Extensive calculation of input signals: $\pm A$, $\pm B$ and all combinations
- Dynamic measurements: Max, Min, Max-Min, Max+Min, Mean
- Programmable either via the integrated keyboard or the RS232 interface by means of MS-Windows configuration software
- Programmable warning and tolerance limits, exceeding the limit causes the color to change from green to yellow to red
- Background lit 2 lined LCD to display measured values, help text and measuring units.
- Analog output: 3 digital inputs (e.g. start of measurement, master measurement)
- 3 digital outputs for GO – NO GO – rework, measuring time
- Scope of supply: Mains cable
