

CESAB P200 1.4 - 2.5 tonne

Powered Pallet Trucks

Effortless pallet handling

CESAB

Finally, a pallet truck that means business.

- ***Compact design offers exceptional manoeuvrability.***
- ***A choice of batteries to suit all applications.***
- ***Engineered for greater reliability.***

When it comes to the needs of pedestrian operations, the CESAB P200 powered pallet truck range means business. With its compact design that includes a rounded chassis and centrally mounted tiller arm, the P200 range delivers excellent manoeuvrability for truly effortless pallet handling.

From retail to wholesale, manufacturing to distribution, the CESAB P200 range offers a flexible solution for all walkie applications. The CESAB P200 range is available in 1.4 - 2.5 tonne capacities with a choice of batteries allowing you to tailor your choice of truck to the demands of your business.

Built using the renowned TPS*, the CESAB P200 range also offers uncompromising reliability for excellent uptime. With its brushless AC motor and leak-free hydraulic couplings, every detail has been designed with reliability in mind.

So not only is day-to-day pallet handling effortless, planning and running your business take a lot less effort too.

*Toyota Production System

CESAB ergonomics

- *Tiller arm designed for optimum manoeuvrability, visibility and safety.*
- *Ambidextrous handle puts all controls within easy reach.*
- *Easy to view screen allows quick and easy programming as well as displaying battery status.*
- *PIN code start-up lets you programme performance to individual operators.*

Easy to operate, easy to manoeuvre.

The CESAB philosophy of *Effortless Pallet Handling* is evident from the moment you take charge of the CESAB P200 powered pallet truck. The length of the centrally placed tiller arm has been optimised to allow excellent control and manoeuvrability by operators of all heights. The tiller length also helps ensure operators are a safe distance from the truck and also provides excellent visibility all around the truck.

The handle and controls of the CESAB P200 range are also designed to enable precise pallet handling. An ambidextrous

handle places all the controls within easy reach of the operator, regardless of hand size, even in confined spaces.

PIN code access to the CESAB P200 range means operating parameters can be tailored to individual staff members, with up to ten different PIN codes available for each of ten different driver profiles. This helps to eliminate the problem of unauthorised operation of the truck for the purpose of safety in the work place.

The chassis skirt sits 35 mm high and rounds away from the operator to help

protect their feet, while the drive wheel is mounted close to the frame to help ensure excellent ramp handling and an uncompromising combination of safety and manoeuvrability.

Emergency buttons are on both the tiller and truck body. The body mounted emergency button both cuts the power and applies the brake, while the tiller mounted button reverses the direction of the truck preventing the operator being crushed.

On time, every time.

- *Exceptional visibility thanks to compact design and sloping power unit.*
- *CESAB Drive Control system delivers smoother control and improved reliability.*

By paying attention to the smallest details, the CESAB P200's designers have created a range of powered pallet trucks that are so easy to use and so reliable that you can focus entirely on getting the job done on time.

Operator visibility is critical to safe and efficient pallet handling and the CESAB P200 range offers excellent visibility. The power unit slopes towards the forks, allowing effortless and precise load handling at ground level.

The tiller design has been optimised for precise control as well as excellent

visibility of the forks. Control of the CESAB P200 range has been optimised, too. Its compact chassis design and the smooth control CESAB Drive Control system, equipped with magnetic switches, mean manoeuvring is truly effortless. While a standard Creep Speed feature allows low speed manoeuvring with the tiller in an upright position.

If your business demands higher intensity pallet handling, the CESAB P220 and CESAB P225 are available with a sideways battery change for quick and easy turnaround between shifts.

- *Fixed AC motors help to eliminate moving cables for improved durability.*
- *Manufactured using the world renowned TPS* that helps to reduce environmental impact and consistently ensures high quality standards.*
- *Extensive use of Teflon® coated composite bushings delivers longer working life.*

*Toyota Production System

Attention to the smallest details combine to create a more reliable truck.

Sometimes failure of the smallest or simplest component can lead to lost production and unnecessary costs. The CESAB P200 designers have achieved exceptional reliability by focusing attention on the smallest details to mitigate potential weaknesses found in other powered pallet trucks.

CESAB Drive Control System.

The P200's CESAB Drive Control system uses contactless switches, so there are no mechanical contacts to wear out. CAN-bus wiring further enhances reliability and ensures smooth power delivery across the full range of operating speeds, a key benefit when operating in confined spaces.

Quick and easy servicing.

The access cover of the CESAB P200 range is secured with two screws for quick and easy access during servicing. The digital display shows error codes that allow service engineers to quickly identify any problems and ensure excellent uptime.

Built with your reputation in mind.

At CESAB we understand that when you choose your materials handling equipment you are investing more than the purchase price - you are investing your reputation.

The best way to experience the excellent engineering and design of the CESAB P200 range is to put it to work in your business.

Whatever your market place there are a range of options that let you tailor the CESAB P200 to your specific needs, including:

- An accessories bar fitting for the mounting of accessories such as a barcode scanner holder and clipboard.
- The option of an accessories bar fitted power supply that allows the mounting of third party accessories such as a PC.

- A flip-up operator platform** with a unique tiller design for platform operation but still allowing effortless pedestrian operation.
- The option of a built-in charger.

The CESAB P200 range is the product of efficient production processes, cleaner working operations and is highly recyclable at the end of its working life. So when you choose a CESAB P200 powered pallet truck you can rest assured that you are playing your part in protecting the environment.

- *Optional operator platform available. Includes a unique tiller arm design that offers excellent ergonomics.*
- *Engineered using the latest welding and powder painting technologies to reduce environmental impact.*
- *Recoverability rate close to 99% at end of working life.*

**platform only available for CESAB P220

Big on manoeuvrability, even in the smallest spaces.

The CESAB P200 range has been designed to deliver exceptional manoeuvrability in even the smallest spaces. A choice of batteries allow you to further tailor the truck to the specific demands of your business.

Exceptional manoeuvrability, exceptional visibility.

The compact chassis of the P200 range delivers exceptional visibility and manoeuvrability. The length of the truck, excluding forks, is only 481 mm when equipped with the small battery compartment.

Complete control even in confined spaces.

Using the Creep Speed feature the CESAB P200 range can be operated with the tiller arm in a fully upright position, further enhancing manoeuvrability and operator control.

Quality you can count on.

For more than 50 years CESAB has been at the forefront of forklift truck design. The CESAB P200 range combines this experience with the world renowned TPS* to bring you a range of powered pallet trucks that deliver excellent reliability day after day after day.

*Toyota Production System

The capacity to grow with your business.

- *The CESAB philosophy of Effortless Pallet Handling is evident from the moment you take charge of the CESAB P200 pallet truck. When it comes to the needs of pedestrian pallet handling operations, the CESAB P200 powered pallet truck range means business.*

Don't take our word for it, try out a new P200 for yourself.

So why choose a CESAB P200? Quite simply because you're in the business of pursuing the speed and efficiency afforded by effortless pallet handling. To test drive a CESAB P200 for yourself, simply contact your local CESAB dealership and discover just how effortless pedestrian pallet handling could be.
