COMBINED SAFETY STORAGE CABINETS CERTIFIED FOR HAZARDOUS PRODUCTS

**COMBINED SAFETY STORAGE CABINETS
CERTIFIED FOR HAZARDOUS PRODUCTS**

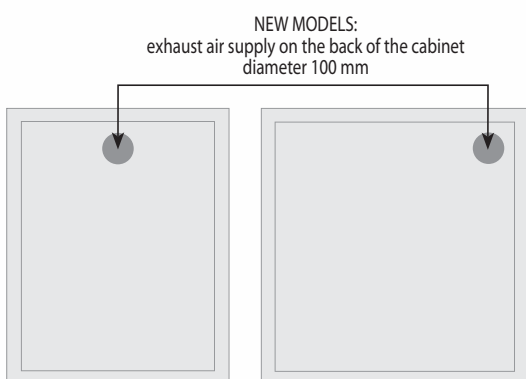

The answer to properly store and use hazardous products directly in laboratory.

- **COMBISTORAGE UNDERBENCH** to optimize spaces in laboratory.
Simply replacing the underbench standard wooden or metal cabinets, with our combined safety cabinets.
Numberless options for dimensions and typologies and hazardousness.
If ventilation is needed a vent is on the back wall for easy connection.
- **COMBISTORAGE 2, 3, 4** compartments.
To safely group all hazardous products in laboratory.

Safety underbench cabinets shall be combined on plinths with different lengths:

Plinth 1200 mm length (CSFZ120) + CS101ACSZ (600 mm) + CSF238SZ (590 mm)

Plinth 1500 mm length (CSFZ150) + CS101ALSZ (600 mm) + CSF235CSZ (490 mm) + CS112BCSZ (400 mm)
