

AXIAL EXPLOSION PROOF FANS

**EB Ex-ATEX** CESI approval N.03 ATEX 251

# AXIAL EXPLOSION PROOF FANS

## EB Ex-ATEX CESI approval N.03 ATEX 251

- Explosion Proof certified Axial Fans for wall or panel mounting to convey air directly outside or through a short duct compliance to ATEX Directive 94/9/EEC effective in European Community from July 1st 2003. These products are a safe choice for many applications in commercial and industrial environment where the risk of explosion is high and where the surrounding atmosphere contains gas, vapors or steam highly inflammable.

- The whole product and not just the electrical parts, has been certified by the Italian Notified Body CESI with certify number CESI n°03 ATEX 251.

- Reference standards: EN 13463-1: 2003 pr EN 14986: 2005.

- Fan group II, cat. 2 for gases, construction safety c, max surface temp. T4 (135°C).

- Classified for zones 1 and 2.

- This omologation has required specific safety tests and proper examinations on products to verify how the introduced solutions have satisfied the essential Directive requirements.

- Body built in metal sheet epoxy painted. Impeller statically and dynamically balanced in high resistance polymeric material, V0 self extinguishing material with high electrical conductivity properties.

- Available flow rates from 900 to 4500 m<sup>3</sup>/h.

- Motor EEXd-II B - T4, IP 55 protected supplied with cable gland for cables from Ø10 up to Ø11,5 mm.

- Working temperature: -20 + 40 °C.

### Reversibility:

- All models.
